

## Joint Note from Board members :

Wish you all a very Happy New Year!

The year 2017, was a good year for Live Life Love Life Charity Foundation with sincere efforts taken by our team and our beneficiaries to detect and treat less-privileged women for cervical cancer in and around Pune. We pray and hope that we can extend our horizons and help a larger group of women in 2018.

In the last quarter, we received a generous donation of Rs. 5 lac - a sole contribution by the employees of Kantar TNS India. The employees will be involved in various 'Cervical Cancer Screening Camps' that are undertaken by the beneficiaries namely, Prayas Healthcare, Care India Medical Society and Nag Foundation.

We greatly value each individual's contribution and express our gratitude to all donors who helped LLLLCF make a difference.

### 3. Nag Foundation

Nag Foundation treated 20 patients in this quarter with the Herceptin injections by organising awareness and medical camps.

Herceptin works by attaching itself to the HER2 receptors on the surface of breast cancer cells and blocking them from receiving growth signals. By blocking the signals, Herceptin can slow or stop the growth of the breast cancer, giving a normal and healthy lifestyle to the patient.
