

### Joint Note from Board members :

The last quarter for Live Life Love Life Charity Foundation has been extremely successful. More than 700 women were thoroughly medically tested for cervical cancer through 17 number of camps. All these camps were located in the rural areas on the periphery of Pune city. More than 90% of the women screened are under-privilege and thus, this screening has proven to be all the more crucial and beneficial for them.

Out of the 700 women screened, 30 have been detected with symptoms of cancer and are currently receiving gratuitous chemotherapy treatment.

We are in deep gratitude towards all our donors, who have come forward to generously donate for this cause and also towards our beneficiaries who are doing an excellent job.

- Praful Chandawarkar and Suraj Repe

### Report of Patients (Beneficiaries of Chemotherapy) At CIMS(Care India Medical Society)

**Sharda Chigar**

Age : 55 years

Diagnosis : Ca Breast

Brief: She is a housewife who has 5 daughters all of whom are married. Her husband has retired and gets a pension of Rs 2000/- plus they get Rs. 4000/- as rent for rooms that they have let out. She has already been operated and has to undergo 6 cycles of chemotherapy out of which she has completed 3 cycles. She has a fair prognosis.

Contact No. : 9595527575 / 8999935287

**Supriya Mane**

Age : 37 years

Diagnosis : Ca Ovary (with metastasis)

Brief: She is a young patient with two children, a 19 year old boy and a 12 year old girl. The family is very needy since her husband has been obless for the last few months. They are dependent on her in-laws and live in her brother-in-law's house. She is being provided chemotherapy medicines free of cost by our organization and chemo is being administered at the Command Hospital. If the chemo is effective she will be operated free of cost at the Command Hospital.

<b>Total</b>			<b>769</b>	<b>19</b>

Nag Foundation has also been a part of LLLLCF and have treated 12 patients this quarter with the Herceptin injections

Herceptin works by attaching itself to the HER2 receptors on the surface of breast cancer cells and blocking them from receiving growth signals. By blocking the signals, Herceptin can slow or stop the growth of the breast cancer, giving a normal and healthy lifestyle

### Screening Camps & Activities:

---

## Event of the Quarter:

LLLLCF sponsored a camp for cervical cancer held at Swarovski factory by Prayas Healthcare

### Thought of the Quarter:

Do Good, Feel Good Inspiration  
Philanthropy is not about money, its about feeling the pain of others  
and caring enough about their needs to help. - Timothy Pina
