

Joint Note from Board members :

The last quarter for Live Life Love Life Charity Foundation has been good. Many financially deprived women were medically tested for cervical cancer through various camps conducted in the outskirts of Pune city.

The Live Life Love Life Charity Foundations also provided essential equipment like the Semi-Automated Biochemistry, Fully-Automated Analyser and Fully-Automated 3-Part Hematology System that help counting cancer cells and preventing them to grow within minutes to CIMS.

We are in deep gratitude towards all our donors, who have come forward to generously donate for this cause and also towards our beneficiaries who are doing an excellent job.

Screening Camps & Activities.

Nag Foundation has also been a part of LLLLCF and have treated 15 patients this quarter with the Herceptin injections

Herceptin works by attaching itself to the **HER2 receptors** on the surface of breast cancer cells and blocking them from receiving growth signals. By blocking the signals, Herceptin can slow or stop the growth of the breast cancer, giving a normal and healthy lifestyle

Event of the Quarter.

LLLLCF celebrated Annual Fund Raiser Evening on 16th September, 2017 at Malaka Spice, Koregaon Park

Do Good, Feel Good Inspiration
